

IoT Mobile Connectivity Landscape 2022

Enabling Connectivity for IoT Devices

Service Layer

Fleet Management

IoT Enablement Platform

Data Management

Device Management

Device Lifecycle

To keep this landscape as compact as possible, we have focused on the most important companies in the respective categories.

Connectivity Management

Specialized IoT Connectivity Providers

Connectivity Management Platform

Subscription Management: SM-DP | SM-SR | eSIM IoT Remote Manager

Device Layer

Mobile Connectivity Hardware

Chipset | SoC

Modules

Gateway | Cellular Modem | Router

Device Software

eUICC Manufacturers

Device Operating System

Middleware
