

## Intervention Concept

### Which intervention does our DiPA provide?

- Does our DiPA contribute to the care status around a specific medical condition; e.g. Parkinson's or Alzheimer's?
- Does our DiPA contribute to medical-independent care needs?
- For which degree of care ("Pflegegrad") shall our DiPA work?
- What is the goal of the intervention delivered through the DiPA?
- Where are obstacles in the healthcare systems and how can our DiPA contribute to solving these?
- On which scientific concepts does our DiPA build upon?
- Which guidelines have been followed when defining the content?
- What is the intended time of use for therapeutical reasons?
- Who is going to use the DiPA?
- Is supplementary support ("ergänzende Unterstützungsleistungen") by professional care givers required?

### Goals

- Reduction of impairments to independence
- Stabilizing/improving recipient's health
- Counteracting a worsening of need of care

### Usage & Supplementary Support

- Care receiver independently
- Care receiver and ambulatory care giver
- Care receiver and informal care giver

## Functionality Concept

## Positive Care Effect

## Relations to Care Receivers and Care Givers

## Pricing and Care Insurer Strategy

## Technical and Regulatory Strategy

## Evidence Strategy
